

NOTHING IN THE WORLD MATCHES THE PERFORMANCE OF

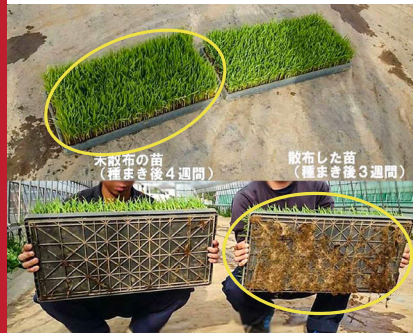

APEX-10™

Rice seedlings at 3 weeks, with & without Nature's Wonder®.

Excellent head-start on root development, & will also help with transplant stress & re-establishment.

Potato progress this year at the same farm.

Greatly increased potato yields after 3 months.

Begonias with & without Nature's Wonder after only 10 days.

The presence of white roots demonstrates continued growth during 3½ week drought.

With & without after 3 months. Increased root mass/depth allows drought resistance & nutrient uptake.

Daikon at 17 days with & without APEX-10™.

APEX-10™ IS MADE IN AMERICA BY NATURE'S WONDER, A DIVISION OF JSHINTERNATIONAL

APEX-10™

**THE BEST FRIEND A
MICROBE COULD EVER HAVE!**

As a high caliber agricultural professional, you clearly understand the absolute importance of maximizing the microbial activity in the soil. Healthy and active microbes are the genesis of healthy soil, turf, plants & crops. Feeding the microbes the proper additive can make all the difference between great success and average to failed results.

It is time to introduce your soil microbes to their new best friend - Nature's Wonder® APEX-10™. Using this product is like feeding the microbes a high powered energy drink. There is nothing on the market today that can match the performance of APEX-10™ for microbial population growth & activity.

MICROORGANISM 'A'

Certain microorganisms will metabolize our formulations, stimulating their activity & causing them to release enzymes and metabolites.

MICROORGANISM 'B'

Those microorganisms that do not metabolize our formulations will be stimulated through the fallout of these enzymes and metabolites.

CHAIN REACTION

For this chain reaction to continue, ongoing treatment is required to maintain stimulation.

END

At the end of this chain reaction, the material is transformed into naturally occurring byproducts of organic degradation- hydrogen, oxygen and carbon molecules.

**UNLEASH THE POWER OF YOUR
MICROBIAL WORKFORCE**
